

Supply of Dressings to Patients

An FP10 prescription should not be used for dressing supply in most cases

Exceptions to Formeo dressing supply where an FP10 is required

- Patients requiring an urgent supply of a formulary dressing which is not held in stock by the surgery, district nurses, or nursing home. Sourcing stock from Formeo can take up to 7 days.
- Patients who are housebound and not appropriate for district nurse referral so managed by the GP surgery and who cannot get to the surgery to collect **formulary** dressings and have no representative to do so on their behalf.
- Patients who have been reviewed by a tissue viability nurse and assessed to require a dressing not available via Formeo.
- In the rare situations where there is a clinical need for a non-formulary product.
- In the rare situations where patients in their own home need labelled stock.
