

# REMEDY *What's new?* October 2024

We would like to bring to your attention the following new pages which have been added to Remedy in the last month:

- [Cancer Decision Support Tools](#) - this page holds links to websites that may support your assessment of whether your patient has symptoms with a high probability of cancer.
- [Cancer and Severe Mental Illness](#) - this page contains links to new online resources to help people with serious mental illness feel more confident and in control when it comes to cancer.
- [SR1 Form \(formerly DS1500\)](#) - describes the process for clinicians and patients for claiming under the Special Rules when nearing end of life.
- [PICA \(eating non-edible items\)](#) - the Children's Hospital have produced a guideline for Management of a child with PICA.
- [Hospital Discharge Pathways](#) - describes the different Discharge to Assess (D2A) pathways.

The following pages have been updated:

- [Vaccination in Pregnancy](#) - information on appropriate vaccinations during pregnancy has been updated.
- [Dizziness and Vertigo](#) - information has been added on Vertebrobasilar Insufficiency (VBI).
- [Arrhythmia](#) - this page has been updated regarding deactivating Implantable Cardioverter Defibrillators (ICDs)
- [ADHD & Autism Right to Choose](#). The spreadsheet on both the Adult's and Children's ADHD and ASD pages has been updated to show the latest providers available in BNSSG and to clarify the level of post-diagnostic support available. Where a provider has indicated availability of post diagnostic support, referrers/patients should contact them directly to check what this includes before making a decision on this basis. Some post diagnostic support offers for ADHD and Autism may be limited to signposting to other organisations. **ADHD resources**. A link has been added to the Adult's and Children's ADHD pages, to useful resources around the assessment process on the Think ADHD Resource Hub.
- [Adult Safeguarding](#) - from 1st November there is a new provider for all types of advocacy in Bristol. See the Remedy page for contact details.
- [Milk Related Problems](#) - guidelines on Milk Related Problems in children have been updated following a detailed review.
- [Plagiocephaly and Craniosynostosis](#) - this page has been updated in line with the latest Children's Hospital guidelines.
- [Language Services - Interpreting and Translation](#) - Bristol ICE PCN have created a very large directory of translated documents on a large range of health subjects. This Remedy page links to the Directory on TeamNet.

Please note the following:

- [Respiratory Advice & Guidance](#) - UHBW are now providing Respiratory A&G via eRS. In addition, the phone number for Respiratory Consultant advice at NBT has been updated.
- **Change to Service names in eRS** - both NBT and UHBW have updated some service names in eRS. RAS services are now called Triage Services, 2WW has been updated to Urgent Suspected Cancer and A&G services now use the names Advice & Guidance in full.

As always, if you have any feedback on Remedy, please use the  button which is available on each individual page on Remedy (top right of the page).

Alternatively, if you have a more general query, please email [Vicky.ryan@nhs.net](mailto:Vicky.ryan@nhs.net) or

Dr [Rob Adams](#), ICB Referral Service GP Clinical Lead.

**Together we are BNSSG**
